***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16 and 19-20 drawn to solar light box, classified in class 362, subclass 253.
  - II. Claims 17 and 18 are drawn to a method of making a solar cluster box by molding, classified in class 264, subclass 1.1

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, invention II, method of making a solar cluster light box has a separate utility and can be used to make electrical illumination devices including headlights, edge lighted panels, sound equipment illuminators, machinery lighting etc.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
